**Drug Facts**

*Active ingredients (in each caplet)*
- Buffered aspirin 500 mg

*Purpose*
- Pain reliever

**Use**
- Treats the mild to moderate pain of migraine headache

**Warnings**
- **Reye's syndrome:** Children and teenagers should not use this drug for chicken pox, or flu symptoms before a doctor is consulted about Reye's syndrome, a rare but serious illness reported to be associated with aspirin.
- **Allergy alert:** Aspirin may cause a severe allergic reaction which may include:
  - hives
  - facial swelling
  - asthma (wheezing)
  - shock
- **Alcohol warning:** If you consume 3 or more alcoholic drinks every day, ask your doctor whether you should take aspirin or other pain relievers/fever reducers. Aspirin may cause stomach bleeding.
- **Do not use**
  - if you have ever had an allergic reaction to any other pain reliever/fever reducer

**Ask a doctor before use if you have**
- never had migraines diagnosed by a health professional
- a headache that is different from your usual migraines
- the worst headache of your life
- fever and stiff neck
- headaches beginning after or caused by head injury, exertion, coughing or bending
- experienced your first headache after the age of 50
- daily headaches
- a migraine headache so severe as to require bed rest
- asthma
- bleeding problems
- ulcers
- stomach problems such as heartburn, upset stomach, or stomach pain that do not go away or recur
- problems or serious side effects from taking pain reliever/fever reducers
- vomiting with your migraine headache

**Ask a doctor or pharmacist before use if you are**
- taking a prescription drug for:
  - anticoagulation (thinning of the blood)
  - diabetes
  - gout
  - arthritis
  - under a doctor's care for any serious condition
  - taking any other drug
  - taking any other product that contains aspirin, or any other pain reliever/fever reducer

**Stop use and ask a doctor if**
- an allergic reaction occurs. Seek medical help right away.
- migraine headache pain is not relieved or gets worse after first dose
- new or unexpected symptoms occur
- stomach pain or upset gets worse or lasts
- ringing in the ears or loss of hearing occurs

If pregnant or breast-feeding, ask a health professional before use. It is especially important not to use aspirin during the last 3 months of pregnancy unless definitely directed to do so by a doctor because it may cause problems in the unborn child or complications during delivery.

Keep out of reach of children. In case of overdose, get medical help or contact a Poison Control Center right away.

**Directions**
- Adults 18 years and older:
  - take 2 caplets with a full glass of water
  - if symptoms persist or worsen, ask your doctor
  - do not take more than 2 caplets in 24 hours unless directed by a doctor
- under 18 years of age: ask a doctor

**Other information**
- each caplet contains: calcium, *(insert number of milligrams)*
- store at 20 - 25°C (68 - 77°F)
- save carton for full directions and warnings
